**OXYGEN AND OZONE SAFETY TRAINING**

**LAS VEGAS, Nevada (September 15, 2020)**—The International Ozone Association (IOA) is committed to the safe use of ozone. With that pledge in mind, the IOA-PAG Municipal Committee developed a FREE online training video for those working with ozone and related oxygen feed gas systems. The examples highlighted in the presentation are from municipal water treatment facilities, but the hazards and safety practices shown are relevant to many applications.

This training is intended to provide general ozone and oxygen safety awareness and guidelines to assure that all safety precautions are being met. Please note, this is not intended to take the place of relevant local, state, and federal requirements nor site-specific considerations for ozone and oxygen systems.

This training is intended to provide general ozone and oxygen safety awareness and guidelines to assure that safety precautions are being adhered to. In addition, always check and follow relevant local, state, and federal requirements and site-specific considerations for ozone and oxygen systems.
