

The International Ozone Association (IOA) is your worldwide gathering and technology transfer point for ozone information—bringing together scientists, engineers, systems designers, technologists, equipment manufacturers and end users.

**NO ONE HAS MORE EXPERIENCE AND RESOURCES ON OZONE THAN WE DO.**

When we share the IOA's experiences and research data on ozone and other related oxygen compounds with the world, we benefit each other. And, when you're a member, we benefit you.

## WE'RE ONLY BEGINNING TO DISCOVER

ozone's potential. As a powerful disinfectant with a positive environmental footprint, ozone is used worldwide to improve how we live.

Whether you turn on the tap or turn to a bottle for drinking water, ozone provides superior disinfection. When you visit an aquarium or water theme park, it's ozone that keeps water healthy and clear. And when you enjoy fresh produce, ozone works to eliminate mold, bacteria and more.

Ozone makes a difference in private, municipal, manufacturing and research sectors—from mining to motion pictures and from biotechnology to cosmetics and more. The International Ozone Association unites these for our members.

## MEMBER BENEFITS

*When you join IOA, you'll receive:*

- **ACCESS** to more than 1,500 of the world's top specialists in applied and experimental ozone technology
- **REGULAR, BIMONTHLY UPDATES** on the latest developments in equipment, applications and literature through the IOA newsletter, **OZONE NEWS**
- **DETAILED ANALYSES** of major research and developments through bimonthly issues of the IOA Journal, **OZONE: SCIENCE & ENGINEERING**
- **ONLINE RESOURCE ACCESS** to four decades of ozone research and applications in nearly 100 industries and processes—including the ones that matter to you
- **WHO'S WHO IN OZONE** listing and international industry and peer recognition for contributions
- **MEMBER DISCOUNTS** to the biennial International Ozone World Congress, technical meetings and seminars as well as to meeting proceedings when you just can't make the trip

## BECOME A MEMBER TODAY

IOA welcomes all with a direct or indirect interest in the development and advancement of ozone technology. Our members include:

- Individuals
- Academic and nonprofit organizations
- Students
- Consulting firms
- Corporate members, including commercial laboratories and private research institutions
- Manufacturers

The IOA's Pan American Group (PAG) welcomes members in North, Central and South America, and is a tax-exempt organization under Internal Revenue Service Code 501(c)(3). All contributions of membership donations are tax-deductible.
